

BUG-SCAN® ROLL

TECHNICAL DATA SHEET

Targets

- Whiteflies
- Leaf miners
- Sciarids
- Aphids
- Thrips
- Leafhoppers
- *Tuta absoluta*
- Many other flying insects

Crops

In all protected crops:

- Vegetable crops
- Ornamental crops
- Soft fruits
- Propagation

What is Bug-Scan® Roll?

- Roller trap made of durable plastic with glue on both sides. This glue is long-lasting, water-resistant, non-toxic and does not dry out at high temperature.
- Commonly used tool for the timely detection of a new infestation and/or for monitoring the population sizes of pests already present and/or creating a physical barrier.
- Available in yellow, blue, red and black.

Mode of action

Insects are naturally attracted by the specific colour and then trapped by the glue. The yellow colour is very attractive to most flying insects, blue attracts mainly thrips, red attracts leafhoppers and black attracts *Tuta absoluta*.

Product specifications

Product	Width	Length
Bug-Scan® Roll Yellow	5 cm	100 m
	10 cm	125 m
	15 cm	100, 110, 125, 150 and 170 m
	30 cm	100 m
Bug-Scan® Roll Blue	10 cm	125 m
	15 cm	125 m
	30 cm	100 m
Bug-Scan® Roll Red	30 cm	100 m
Bug-Scan® Roll Black	30 cm	100 m

Storage

- Store at room temperature (5 – 25 °C) in a dry place, away from direct sunlight.
- Keep the package closed until use.

User instructions

Timing

Use Bug-Scan® Roll from the beginning of cultivation.

Applications

1. **Physical barrier:** Place the Bug-Scan® Rolls near windows, doors and corridors, or in areas where high pest influx is expected. Insects entering the greenhouse will be immediately attracted and trapped by the Bug-Scan® Roll. Be careful not to place the roller traps too close to windows and doors, as they may attract insects inside.
2. **Monitoring insects:** Place the Bug-Scan® Rolls approximately 20 cm above the plants, the 30 cm width rolls should be placed 40 cm above the plants. Black roller traps should be placed close to the ground.

Handling

- Before unrolling, store the Bug-Scan® Rolls for minimum 24 hour at room temperature. The glue will soften, and the roller traps can be easily unrolled.
- There is a 1 cm glue-free border on both sides of the roll and a non-sticky part at the beginning to make unrolling easier.

DISCLAIMER

Use plant protection products safely. Please read the label and product information before use. Please consult the instructions for use to prevent potential harm
